PROGRAM OVERVIEW

This program is designed to provide students with a hands-on working knowledge of how businesses store, maintain and share vast amounts of information in the global economy, while also adapting to the ever-changing world of technology. The program focuses on the technical aspect of maintaining, troubleshooting and repairing computer and network systems. The Microcomputer Support option prepares students for a number of careers, such as systems analyst, network managers, "help desk" technicians, microcomputer technicians and information support personnel. The focus is on building technical, managerial, and interpersonal skills, allowing the graduate to succeed in a variety of business and Information Technology settings. This degree also prepares students for certification exams such as the A+.
