

Connecting to HCC Wireless – Staff, Faculty and Students with iOS devices

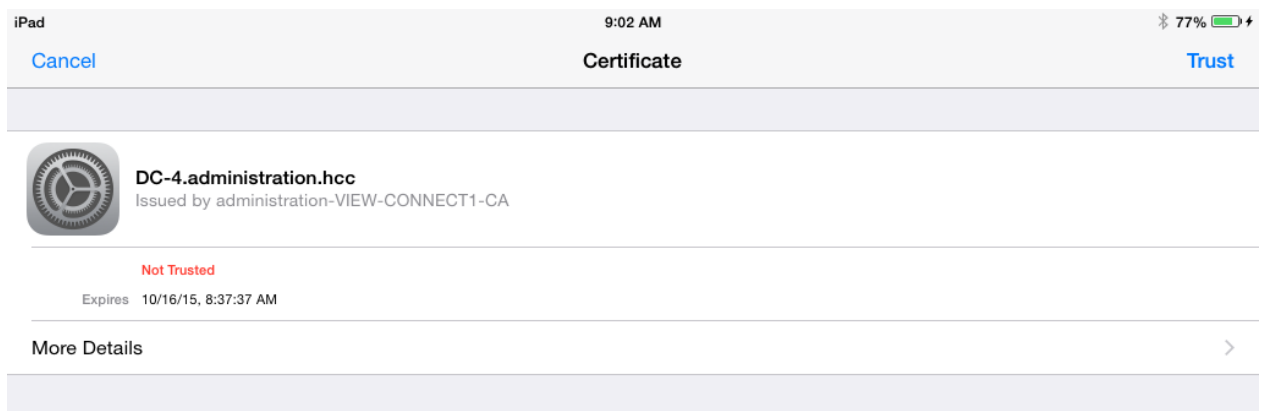

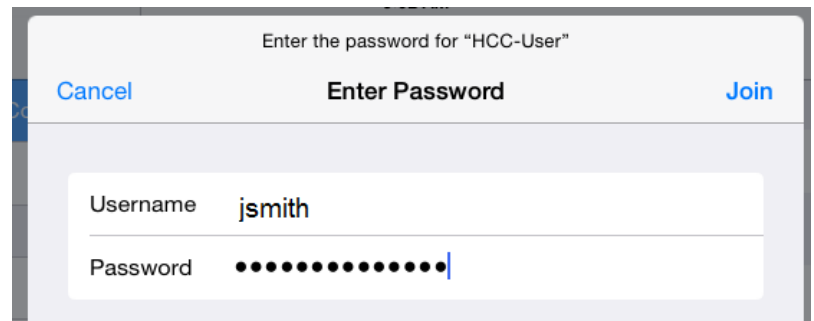

Staff, Faculty and Students should always be connecting to the wireless network labeled: **HCC-User**.

On a phone, tablet or laptop, choose the network **HCC-User**.

*If you've previously connected to HCC-Guest, you will have to "Forget" the network so that it does not try to automatically connect.

You will be prompted to login. Enter the same username and password as your HCC account and tap **Join**. On the next screen, tap **Trust** to accept the certificate. Your device will now remember this connection for the future.
